Summary

A creative and analytical 2nd-year Computer Science student skilled in full-stack development (HTML, CSS, JavaScript, Java, Python, PHP, SQL, C#) and mobile development (Android Studio).

Education

CIIT College of Arts and Technology — 2nd Year
Computer Science (BSCS) — July, 2024 – Present

Projects

Personal Portfolio Website — 2024-2026
Interactive single-page portfolio showcasing professional projects, technical skills, and experience. Features dark/light theme toggle, integrated music player, responsive design, smooth scroll animations, and interactive skill progression bars. Built with vanilla HTML, CSS, and JavaScript.
https://webcvabinales.netlify.app

Miku Expo Online Store | Laravel E-Commerce Application — 2025
A full-featured Laravel-based e-commerce web application for merchandise sales at a Hatsune Miku expo event with user authentication, shopping cart, order processing, and admin dashboard.
https://github.com/jianne-cs/WebDevFInalsMikuExpoOnlineStore

STRIDE | Mental Health Monster Battle Game — 2026
A gamified mental health web application that helps users visualize and battle their stress, anxiety, and mental health challenges through customizable monster avatars with turn-based battle mechanics.
https://stride-stress-battle.netlify.app

Ave Mujica Logic Grimoire — 2026
A desktop application that teaches formal logic through narrative-driven gameplay. Users learn 16 fundamental logical operations (AND, OR, NOT, XOR, NAND, NOR, Implication, etc.) by completing character-driven quests with truth table puzzles.
